

1. How many ways are there to call a function in R?

Ans : There are 3 ways listed below :

When calling a function you can specify arguments by position, by complete name, or by Partial name. Arguments are matched first by exact name (perfect matching), then by prefix matching, and finally by position.

2. Is the below statement true?

- The lazy evaluation of a function means, the argument is evaluated only if it is evaluated only if it is used inside the body of the function.

Ans : True

3. Mention true or false for below statements:

a. Insights driven from descriptive analytics is not meaningful.

Ans : False

b. The number of values in each Elements of a list, should be equal.

Ans : False

c. The datasets are not stored in memory of the computer using R.

Ans : False

d. Data frames and matrices are two dimensional however the array is multidimensional.

Ans : True
